

BIOGRAPHY

**Paul
Neary**

Vice President
and Chief
Financial Officer,
Space Launch
Division, Boeing
Defense, Space &
Security

Paul Neary is vice president of Finance and chief financial officer (CFO) for the Space and Launch division of Boeing Defense, Space & Security (BDS). In this role, he is responsible for all Finance-related activities for the division that encompasses all aspects of Boeing's space programs including the International Space Station; the CST-100 Starliner commercial crew vehicle; NASA's Space Launch System (SLS); government and commercial satellite systems; and Boeing's participation in United Launch Alliance (ULA).

Prior to his current assignment, Neary was the CFO for ULA, where he provided leadership for financial management and fiduciary responsibilities of the company and its financial reporting to ULA's parent companies – The Boeing Company and Lockheed Martin Corporation. Neary was also responsible for multiple corporate functions including Controller, Treasury, Risk Management, Long Range Planning, and Program Planning and Control. Neary also shaped the company's strategies accordingly to capture profitable growth.

Prior to joining ULA, Neary was The Boeing Company Ethics and Business Conduct compliance officer for BDS. In this role Neary was responsible for the global ethics program, ensuring effective deployment of ethics controls and initiatives and promoting a compliant and ethical work culture that enabled strong business performance.

Prior to the BDS Ethics role, Neary served as the chief financial officer for the F/A-18 Program; St. Louis Regional Finance Skill Team leader; director of Corporate Cost Management; and director of Corporate Financial Planning and Analysis and Reporting.

Neary holds a bachelor's degree from Rockhurst College and master's degrees from the University of Missouri-St. Louis and Purdue University.
